*Dear Colleagues*

The *US Ophthalmic Review* welcomes colleagues in the ophthalmology community to contribute articles to the Spring and Fall 2018 editions. The journal is dedicated to the publication of topical articles that provide practical guidance and advice to practising physicians.

We welcome authors to submit original research, review articles, case reports, and editorials across all areas of ophthalmology, for consideration. We are particularly interested in reports of real-world studies, along with concise review articles that translate the latest clinical trial data and developments in the field for busy physicians. Authors can submit their manuscript through the Editorial Manager site (details below) and the journal's editor is happy to receive any pre-submission enquiries. Accepted articles are published open access, both in print and online, and we encourage authors to publish accompanying multimedia content alongside the article.

We look forward to working with you.

Elizabeth Yeu and the *US Ophthalmic Review* Team
